MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 70 (1993)

Accelerated aging, Down's syndrome, skin aging, genetic disorders, 213
AFB_1-DNA binding, caloric restriction, aflatoxin B_1 (AFB_1), AFB_1-induced DNA synthesis, cell proliferation, Fischer rats, 23
AFB_1-induced DNA synthesis, caloric restriction, aflatoxin B_1 (AFB_1), AFB_1-DNA binding, cell proliferation, Fischer rats, 23
Aflatoxin B_1 (AFB_1), caloric restriction, AFB_1-induced DNA synthesis, AFB_1-DNA binding, cell proliferation, Fischer rats, 23
Age, glutathione-metabolism, rat cerebral cortex, 65
Aging, autonomic nervous system, disease risk, 95
Aging, elastin, transforming growth factor-beta, fibroblast growth factor, progeria, 163
Aging, interferon-alpha, interferon-gamma, interleukin-2, soluble interleukin-2 receptors, interleukin-6, 149
Aging, longevity, free radicals, superoxide dismutase, catalase, glutathione peroxidase, glutathione reductase, cytochrome oxidase, oxygen consumption, hydrogen peroxide, 177
Aging, lymphocytes, proliferative response, mitochondria, 201
Aging, molecular basis, cellular basis, thyroid C-cell hormones, food restriction, modulation, 1
Aging, phagocytosis, macrophages, physical activity stress, mice, 53
Aging, phosphorylation, non-histone proteins, histone proteins, submandibular gland, isoproterenol, 127
Aging, pituitary gland, somatotroph cells, serum GH, quantitative immunocytochemistry, 45
Aging, proteinuria, albumin, binding, brush-border membrane, 139
Aging, β-receptor, glucagon-receptor, glycogenolysis, protein kinase C, calcium, 115
Aging, satellite cells, cell proliferation, growth factor, 35
Aging, tail artery, D2 receptors, noradrenaline, rat, 83
Albumin, aging, proteinuria, binding, brush-border membrane, 139
Autonomic nervous system, aging, disease risk, 95

Binding, aging, proteinuria, albumin, brush-border membrane, 139
Brush-border membrane, aging, proteinuria, albumin, binding, 139

Calcium, aging, β-receptor, glucagon-receptor, glycogenolysis, protein kinase C, 115
Caloric restriction, aflatoxin B_1 (AFB_1), AFB_1-induced DNA synthesis, AFB_1-DNA binding, cell proliferation, Fischer rats, 23
Catalase, aging, longevity, free radicals, superoxide dismutase, glutathione peroxidase, glutathione reductase, cytochrome oxidase, oxygen consumption, hydrogen peroxide, 177
CBP35 and CBP67, HnRNP, neclear lectin, transport, rat liver, 227
Cell proliferation, caloric restriction, aflatoxin B_1 (AFB_1), AFB_1-induced DNA synthesis, AFB_1-DNA binding, Fischer rats, 23
Cell proliferation, satellite cells, aging, growth factor, 35
Cellular basis, molecular basis, thyroid C-cell hormones, aging, food restriction, modulation, 1
Cytochrome oxidase, aging, longevity, free radicals, superoxide dismutase, catalase, glutathione peroxidase, glutathione reductase, oxygen consumption, hydrogen peroxide, 177

D2 receptors, tail artery, noradrenaline, aging, rat, 83
Disease risk, aging, autonomic nervous system, 95
Down's syndrome, skin aging, genetic disorders, accelerated aging, 213

Elastin, transforming growth factor-beta, fibroblast growth factor, progeria, aging, 163

Fibroblast growth factor, elastin, transforming growth factor-beta, progeria, aging, 163
Fischer rats, caloric restriction, aflatoxin B_1 (AFB_1), AFB_1-induced DNA synthesis, AFB_1-DNA binding, cell proliferation, 23
Food restriction, molecular basis, cellular basis, thyroid C-cell hormones, aging, modulation, 1
Free radicals, aging, longevity, superoxide dismutase, catalase, glutathione peroxidase, glutathione reductase, cytochrome oxidase, oxygen consumption, hydrogen peroxide, 177

Genetic disorders, Down's syndrome, skin aging, accelerated aging, 213
Glucagon-receptor, aging, β-receptor, glycogenolysis, protein kinase C, calcium, 115
Glutathione peroxidase, aging, longevity, free radicals, superoxide dismutase, catalase, glutathione reductase, cytochrome oxidase, oxygen consumption, hydrogen peroxide, 177
Glutathione reductase, aging, longevity, free radicals, superoxide dismutase, catalase, glutathione peroxidase, cytochrome oxidase, oxygen consumption, hydrogen peroxide, 177
Glutathione-metabolism, age, rat cerebral cortex, 65
Glycogenolysis, aging, β-receptor, glucagon-receptor, protein kinase C, calcium, 115
Growth factor, satellite cells, aging, cell proliferation, 35

Histone proteins, phosphorylation, non-histone proteins, submandibular gland, aging, isoproterenol, 127
HnRNP, neclear lectin, transport, CBP35 and CBP67, rat liver, 227
Hydrogen peroxide, aging, longevity, free radicals, superoxide dismutase, catalase, glutathione peroxidase, glutathione reductase, cytochrome oxidase, oxygen consumption, 177

Interferon-alpha, aging, interferon-gamma, interleukin-2, soluble interleukin-2 receptors, interleukin-6, 149
Interferon-gamma, aging, interferon-alpha, interleukin-2, soluble interleukin-2 receptors, interleukin-6, 149
Interleukin-2, aging, interferon-alpha, interferon-gamma, soluble interleukin-2 receptors, interleukin-6, 149
Interleukin-6, aging, interferon-alpha, interferon-gamma, interleukin-2, soluble interleukin-2 receptors, 149
Isoproterenol, phosphorylation, non-histone proteins, histone proteins, submandibular gland, aging, 127

Longevity, aging, free radicals, superoxide dismutase, catalase, glutathione peroxidase, glutathione reductase, cytochrome oxidase, oxygen consumption, hydrogen peroxide, 177
Lymphocytes, aging, proliferative response, mitochondria, 201

Macrophages, phagocytosis, physical activity stress, mice, aging, 53
Mice, phagocytosis, macrophages, physical activity stress, aging, 53
Mitochondria, aging, lymphocytes, proliferative response, 201
Modulation, molecular basis, cellular basis, thyroid C-cell hormones, aging, food restriction, 1
Molecular basis, cellular basis, thyroid C-cell hormones, aging, food restriction, modulation, 1

Neclear lectin, HnRNP, transport, CBP35 and CBP67, rat liver, 227
Non-histone proteins, phosphorylation, histone proteins, submandibular gland, aging, isoproterenol, 127
Noradrenaline, tail artery, D2 receptors, aging, rat, 83

Oxygen consumption, aging, longevity, free radicals, superoxide dismutase, catalase, glutathione peroxidase, glutathione reductase, cytochrome oxidase, hydrogen peroxide, 177

Phagocytosis, macrophages, physical activity stress, mice, aging, 53
Phosphorylation, non-histone proteins, histone proteins, submandibular gland, aging, isoproterenol, 127
Physical activity stress, phagocytosis, macrophages, mice, aging, 53
Pituitary gland, aging, somatotroph cells, serum GH, quantitative immunocytochemistry, 45
Progeria, elastin, transforming growth factor-beta, fibroblast growth factor, aging, 163
Proliferative response, aging, lymphocytes, mitochondria, 201
Protein kinase C, aging, β-receptor, glucagon-receptor, glycogenolysis, calcium, 115
Proteinuria, aging, albumin, binding, brush-border membrane, 139

Quantitative immunocytochemistry, aging, pituitary gland, somatotroph cells, serum GH, 45

Rat, tail artery, D2 receptors, noradrenaline, aging, 83
Rat cerebral cortex, glutathione-metabolism, age, 65
Rat liver, HnRNP, neclear lectin, transport, CBP35 and CBP67, 227
β-Receptor, aging, glucagon-receptor, glycogenolysis, protein kinase C, calcium, 115

Satellite cells, aging, cell proliferation, growth factor, 35
Serum GH, aging, pituitary gland, somatotroph cells, quantitative immunocytochemistry, 45
Skin aging, Down's syndrome, genetic disorders, accelerated aging, 213
Soluble interleukin-2 receptors, aging, interferon-alpha, interferon-gamma, interleukin-2, interleukin-6, 149
Somatotroph cells, aging, pituitary gland, serum GH, quantitative immunocytochemistry, 45
Submandibular gland, phosphorylation, non-histone proteins, histone proteins, aging, isoproterenol, 127
Superoxide dismutase, aging, longevity, free radicals, catalase, glutathione peroxidase, glutathione reductase, cytochrome oxidase, oxygen consumption, hydrogen peroxide, 177

Tail artery, D2 receptors, noradrenaline, aging, rat, 83
Thyroid C-cell hormones, molecular basis, cellular basis, aging, food restriction, modulation, 1
Transforming growth factor-beta, elastin, fibroblast growth factor, progeria, aging, 163
Transport, HnRNP, neclear lectin, CBP35 and CBP67, rat liver, 227
